"If a man is called to be a street sweeper... He should sweep streets so well that all the hosts of heaven and earth will pause to say, here lived a great street sweeper who did his job well." – Martin Luther King Jr.

This quote such a big part of who I am as a person and as a developer. My goal is to always strive to do the best job that I can. In a work environment that translates to seeking and incorporating any criticism that will make me a better developer, constantly researching and learning, and a perseverance to never give up when I hit roadblocks.

I am ready to leverage my strong work ethic and passion for development to help your team achieve its goals.

Continuous Learning

Doctorate Program

Coda
Sept 2024

Full Stack Workshop

Coding with Callie
March 2024 – April
2024

Development

Bootcamp

App Academy
Nov 2022 – Nov 2023
